Appl. No. Amdt. dated December 22, 2005 Preliminary Amendment

## **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings of claims in the application:

## **Listing of Claims:**

- 1. (Original) A method for regulating transcription activated by the transcription factor NFκB in a part of a blood vessel or vascular graft, wherein the method comprises the step of contacting the graft with a decoy for the transcription factor NFκB.
- 2. (Original) The method of claim 1, wherein the part of the vessel or vascular graft is a vein graft.
- 3. (Currently Amended) The method of claim 1-or-2, wherein the method comprises contacting the NFkB decoy with a part of the vessel or vascular graft *in vivo* or *ex vivo*.
- 4. (Currently Amended) The method of <u>claim 1 any one of claims 1 to 3</u>, wherein the method comprises introducing the NFκB decoy into the vessel or vascular graft using a pressure-mediated method.
- 5. (Currently Amended) The method of <u>claim 1 any one of claims 1 to 4</u>, wherein the method suppresses neointimal formation in the graft by contact with the decoy against the transcription factor NFκB.
- 6. (Original) An agent for protection from intimal thickening in a vascular graft, wherein the agent comprises an NFκB decoy.
- 7. (Original) The agent for protection of claim 6, wherein the vascular graft is a vein graft.
- 8. (Currently Amended) The agent for protection of claim 6-or-7, wherein the agent is for introducing an NFkB decoy into a vessel or vascular graft using a pressure-mediated method.
